

Identified Assets:**Information:**

- Policies
- Policy datastore
- Authentication data
- Authentication datastore
- Authorization data
- Authorization datastore
- Configuration information
- Configuration datastore
- Application authentication data
- Application authentication datastore
- Session data
- Session datastore
- Candidate username, password, and policyIDs
- Backups
- Archivals
- Source Code
- Binaries
- Project resources such as images, html, other content
- Temp files
- Log files
- Error/debug files
- Audit files and records
- Third party software
- Cookies
- Hidden fields
- SessionID
- Certificates, keys, and other crypto artifacts

Functional:

- Authentication Service
- Authorization Service
- Policy Viewer Service
- Policy Datastore service
- Authentication Datastore service
- Authorization Datastore service
- Configuration Datastore service
- Session Datastore service
- Auditing Service
- Logging Service
- Error Handling Services
- Server-Side Interpreters – SQL Engines, XSLT Transformers, XPath Evaluators, XQuery Evaluators, etc.
- XML Parsing – Web Services, AJAX frameworks, Component Configuration, etc.
- Client Side Interpreters – JavaScript, Flash, etc
